The University of Chicago’s Office of Civic Engagement, in partnership with the Judy and Peter Blum Kovler Foundation, is excited to host the 13th annual Peter and Judy Kovler Career Conference for High School Students. The on-campus conference provides opportunities for high school students to connect with and learn about an array of professional fields and career paths. More than 250 local high school students participating in UChicago college and career readiness programs are set to attend.

We are recruiting panelists, facilitators, and general volunteers from a variety of professional fields to share details about their job responsibilities and education/training at the event. Participating professionals can help students develop a thoughtful approach to post-secondary planning and career success. Please register using the QR code or this link by June 14.

We are additionally seeking interactive career workshops, demos, presentations, and simulations for the conference. Please contact kovlercareers@uchicago.edu to learn more.
